171,895
submissions naming the drug

−50,876 without body text

121,019
with body text

−2,257 matched only by *bonta*

118,762
submitted for extraction

−15 rejected by the provider

118,747
extracted

39,383
describe their own treatment

20,811 Medical	**12,716** Cosmetic	**5,856** Unknown

not compared

b Structured extraction

A language model reads the title and body of each submission and returns one schema-validated record.

CONSTRUCTED EXAMPLE, NOT FROM THE CORPUS

Botox for chronic migraine, week 3

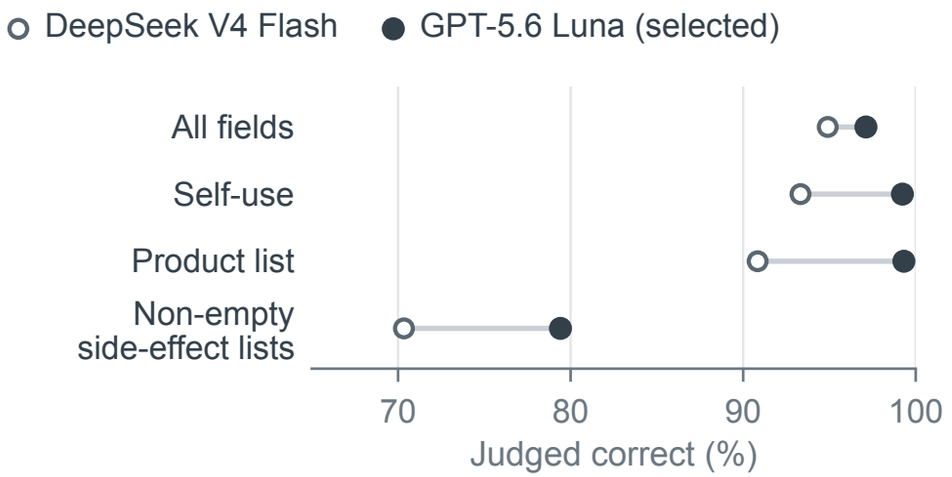

My neurologist injected 155 units.
The headaches are better, but swallowing has been hard since.

Self-use	yes
Indication	medical: chronic migraine
Product	Botox
Dose	155 units
Provider	neurologist
Side effect	“swallowing has been hard”
Candidate term	**dysphagia**
Attitude to side effect	distressed

and 11 further fields, such as onset, duration and age

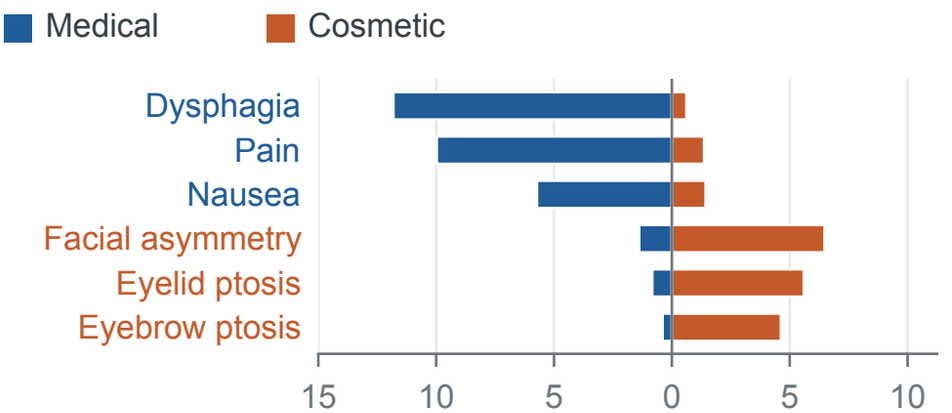

c Model selection by blinded verification

Three annotators judged 136,332 field decisions on 1,168 submissions, blind to which model produced each.

d Medical versus cosmetic reports

Submissions per 100 side-effect reports (6,847 medical, 4,538 cosmetic)

Any side effect: medical 32.9%, cosmetic 35.7%
Profile divergence 0.372 (permutation null 0.009)
